

Test Instruction for AkkuFresh® Next Generation™

First, please read all these Instructions, then You can get started.

NOTE: AkkuFresh® Next Generation™ regenerates the old battery and helps to recover and maintain the near original performance and capacity, reduces the charging time and extends the lifespan of the battery. For quick and best test result use an old battery (i.e. originally 4 days prior to the test only 1 day). To avoid from placebo effect we highly recommend using the device only for testing, during the test period to perform the best test results and to get an accurate measurement. The device shall not to be used as your everyday item! Please keep the testing period under the same circumstances.

1. Make a note of the original performance of your devices standby time, taking into consideration that you must go with standby time all along for accurate measurement. (Standby time is the total time in days or/and hours that a fully charged battery can power a mobile phone in the standby mode, i.e. without any calls being sent or received, no game or music is played on the device etc.)
2. Charge your battery fully and make a note by filling in the date and time right now.
3. Don't charge the battery, and note on the Independent Test form the date and time it loses power.
4. Now, fit the AkkuFresh® Next Generation™ to your portable device battery. It must cover min. 80% of the battery's biggest side. Use more pieces of AkkuFresh® Next Generation™ for larger batteries.
5. Fill in the Test Form details of time and date the AkkuFresh® Next Generation™ was applied.
6. Leave the AkkuFresh® foil on your battery during the test period; recharge the battery fully after it lost power.

7. Then note down the date and time of your last (10th) recharging cycle.
8. After the last recharge leave the device in standby mode, and note the date and the time on the Independent test sheet when the battery has discharged.
9. Sign the Test form.
10. Send it back via email, Skype, or give us a call where we can pick up the completed Test Form.
11. Use AkkuFresh® Next Generation™ Nanotech Battery life Foil.

Don't forget! Do more... with us the fun never ends!

AkkuFresh® Next Generation™ foil's effect performance depends on several factors: Type of mobile phone, brand, model -- type of battery, age, status (total amount of charging-discharging cycles), external temperature, environmental conditions and cellular network.
